

High-Speed Plastic Film Blowing Machine

This high-speed plastic film blowing machine produces polyethylene films. It features dual extrusion heads, automated roll winding, and a centralized control panel.

Product Overview

High-Speed Plastic Film Production Solution

This high-speed plastic film blowing machine is engineered for the efficient production of polyethylene films, including packaging films, agricultural films, and industrial liners. It features a robust frame construction integrated with a high-efficiency heating system and advanced cooling technology to ensure optimized film properties. Designed for productivity, the system includes dual extrusion heads for increased output and an automated roll winding system for streamlined material handling.

Technical Capabilities

Automation Features

- Automated roll winding system
- Centralized control panel

Extrusion Configuration

Dual extrusion heads

Key Performance Metrics

Performance Highlights

2 heads

Extrusion Heads

Compliance and Safety

Compliance

Safety Compliant, Industry Standards

Applications

Suitable Applications

Packaging Films • Agricultural Films • Industrial Liners
