

High-Speed Quilting Machine

This high-speed quilting machine provides an efficient solution for quilting various textile products. It is available in two models, offering precise and consistent quilting performance.

Overview

High-Speed Quilting Performance

The High-Speed Quilting Machine is a versatile and efficient solution designed for high-volume textile production. Engineered for precision and consistency, this machine delivers a reliable 750rpm speed, making it an ideal choice for manufacturing various quilted products. With a robust 5.5kw power consumption and a generous 3300mm working width, it combines industrial power with operational flexibility.

Technical Specifications

Model Specifications

Feature	XHJ-1 2X16/50/8	HXJ-1 2X12/67/5
Heads	2X16	2X12
Needle Distance	50.8mm	67.5mm
Working Width	3352mm	3375mm
Weight	3800kg	3700kg

General Information

Power Supply	3-phase 380V/220V 50Hz
Dimensions	5.7m x 1.5m x 1.7m
Needles per Head	2
