Product Overview

High-Performance Industrial Drill Bits

These professional-grade jobber length twist drill bits are engineered for precision drilling in demanding materials, including stainless steel, aluminum, and hardened iron. Featuring a fully ground construction and cobalt-infused composition, they offer superior heat resistance and durability. Available in a wide range of sizes from 1mm to 20mm, these bits are designed to meet rigorous industrial standards for consistent performance.

Technical Specifications

Sharpening Angle

118 degree • 135 degree • Turbo Max

Helix Angle Type

Type N • Type W • Type H

Available Shank Types

- Straight Shank
- Parallel Shank
- Reduced Shank
- Hex Shank
- 1/4" Quick Change Shank
- 3 Flats Shank
- 1/2" Shank
- 3/8" Shank

Material Options

HSS4241, HSS4341, HSS6542(M2), HSS CO5% (M35), HSS CO8% (M42)

Standards

DIN338, DIN1897, DIN340, DIN1869, DIN345

Size Range

1mm - 20mm

Application & Compatibility

Surface Finish

Tin-coated • Amber • Gold • White • Black

Compatible Materials

Metal, Stainless Steel, Aluminium, Hardened Iron

Rotation

Right Hand, Left Hand
