

High-Speed Steel Cutter Blades

High-speed steel cutter blades are suitable for cutting and shaping. Made from H.S.S W18 steel, these blades offer durability and precision in machining.

Product Overview

High-Performance Cutting Precision

These high-speed steel cutter blades are engineered for demanding metalworking and woodworking applications. Crafted from premium H.S.S W18 steel, they offer exceptional durability and maintain a sharp edge through rigorous machining operations. Designed for professionals, these blades provide the reliability and precision required for consistent, high-quality cutting and shaping results.

Technical Specifications

Key Features

- High-speed steel construction
- Long-lasting sharpness
- High durability
- Precision machining capability

Primary Function

Cutting • Shaping

Material Grade

H.S.S W18 Steel

Industry Use

Metalworking, Woodworking
