Product Overview

Professional 29-Piece HSS Drill Bit Set

This comprehensive 29-piece drill bit set is precision-engineered from high-quality HSS 4241 steel, making it an ideal solution for drilling into metal and aluminum. Designed for durability and performance, the bits feature a robust core and a large increment body to minimize breakage during heavy-duty use. With strict quality control during the quenching process, these bits offer consistent, professional-grade reliability for various industrial and workshop applications.

Technical Specifications

Surface Finish Options

Bright finish • Tin Coated • Black finish

| | |
|-----------------------|---|
| Material | HSS 4241 |
| Manufacturing Process | Roll forged, Full ground |
| Shank Type | Straight |
| Standard | DIN 338 |
| Set Size | 29 |
| Diameter Range | 1/16 - 1/2 inch (increments of 1/64 inch) |

Performance Features

Performance Highlights

- Large body increment prevents breakage
- Thick core design for easier drilling
- Strict quenching temperature control (within 5 degrees) for stable quality
