

# High-Speed Steel Planer Blades

These high-speed steel planer blades are designed for electric planers. They are precision-engineered for smooth and accurate material removal on various types of wood.

## Product Overview

### High-Speed Steel Planer Blades

These high-speed steel (HSS) planer blades are precision-engineered for electric planers, ensuring smooth and accurate material removal. Designed for professional woodworking and DIY projects, they feature a durable cutting edge suitable for various wood types. The slotted design facilitates secure mounting, precise adjustment, and easy replacement to minimize downtime.

## Technical Specifications

Material	High-Speed Steel (HSS)
Identification Codes	HSS, SS-H, 108419

## Key Features

### Performance Features

- Precision-engineered for accuracy
- Durable cutting edge
- Slotted design for secure mounting
- Easy installation and replacement

### Suitable Applications

Professional Woodworking • DIY Projects • Various Wood Types
