

High Strength Braided Rescue Rope

This high-strength nylon rope is designed for climbing, rescue, and safety applications. It features a braided construction with a 7/16" diameter, offering durability and reliability.

Product Overview

High-Performance Braided Rescue Rope

This high-strength nylon braided rope is engineered for demanding environments, serving as a reliable solution for climbing, rescue operations, and safety applications. With a robust construction designed for durability and abrasion resistance, it provides the security needed for life-line and escape scenarios. Available in multiple lengths and high-visibility colors, this rope meets professional requirements for strength and elongation control.

Technical Specifications

Tensile Strength

8000 lbs

Tensile Strength

Elongation Performance

Load	Elongation
450 lbs	3.5%
900 lbs	7.0%

Diameter	11 mm
Weight	6.2 lbs/100'

Options & Variants

Available Colors

White • Black • Red • Orange • Olive

Available Lengths

- 150 feet
- 200 feet
- 300 feet
- 600 feet

Usage & Applications

Primary Applications	Climbing, Rescue Operations, Escape Systems, Life Line, Fire Safety, Gymnastics
