

High-Strength Hex Head Bolts and Nuts

These high-strength bolts and nuts are designed for use in heavy machinery and structural applications. Featuring a black finish, the bolts have hexagonal heads and are paired with matching nuts, ensuring secure and stable connections.

Product Overview

High-Strength Fastening Solutions

These high-strength hex head bolts and nuts are engineered for demanding industrial and structural applications. Featuring a durable black finish, these components are designed to provide secure, reliable connections in heavy machinery and engineering projects. This collection includes various lengths to accommodate diverse assembly requirements.

Technical Specifications

Finish

Black Finish

Key Features

- High-strength material composition
- Hexagonal head design for secure tightening
- Includes matching nuts for complete assembly
- Corrosion-resistant black finish

Fastener Type	Hex Head Bolt and Nut Set
Bolt Size	1/2"-13 x 2"
Common Applications	Heavy Machinery, Structural Engineering, Industrial Assembly
