

# High-Strength Linear Contact Wire

This is a high-strength linear contact wire designed for industrial use. The wire features a multi-strand construction, offering enhanced flexibility and durability for lifting and rigging applications.

## Product Overview

### High-Strength Linear Contact Wire

This high-strength linear contact lay wire is engineered for demanding industrial applications requiring reliability and durability. Featuring a multi-strand construction, it offers enhanced flexibility, making it an ideal choice for heavy-duty machinery, lifting, and rigging operations. Designed to withstand rigorous use, this wire provides consistent performance in challenging environments.

## Technical Specifications

Construction	Linear contact lay wire
Specification Code	8 x 55SWS+FC

## Key Features

### Design Benefits

High-Strength • Multi-strand Construction • Enhanced Flexibility

Primary Applications	Lifting, Rigging, Heavy-duty machinery
