

High Temperature Infrared Thermometer

This professional-grade infrared thermometer is designed for non-contact temperature measurement in industrial applications. It features a high temperature range and precise optics for targeting small areas.

Product Overview

Professional Industrial Infrared Thermometer

This professional-grade infrared thermometer is engineered for precise, non-contact temperature measurement across diverse industrial and engineering environments. Featuring high-temperature capabilities and advanced optics, it allows for accurate monitoring of small targets and equipment to ensure optimal process control. Its ergonomic, durable design is built to withstand rigorous use while providing clear, reliable data via an integrated LCD display.

Technical Specifications

Temperature Range

99.5 °C

High Temperature Limit

22.5 °C

Ambient Operating Temp

Core Features

- Non-contact measurement
- High-precision optics
- Adjustable emissivity settings
- Ergonomic, durable construction
- Clear LCD display

Certifications

Regulatory Compliance

CE • RoHS
