

High Thrust Caulking Dispenser

This caulking gun is designed for applying sealants and adhesives. It features a high thrust ratio for dispensing thick materials and durable construction for long-lasting use.

Product Overview

Professional Grade Dispensing

This high thrust caulking dispenser is engineered for professional applications, offering a robust steel body paired with a durable aluminium handle. Designed with user comfort in mind, it features integrated finger grips to reduce hand fatigue during extended use. The reinforced structure ensures reliability and consistent performance when applying viscous sealants and adhesives.

Physical Characteristics

Net Weight	547 g
Construction Materials	Steel Body, Aluminium Handle

Design Features

Ergonomic Features

- Finger grips for user comfort
- High thrust ratio mechanism
- Reinforced professional structure
