

High-Velocity Floor Fan

This high-velocity floor fan provides powerful air circulation. It features a durable metal construction with a three-speed motor for adjustable airflow and a tiltable fan head.

Overview

High-Velocity Performance

This high-velocity floor fan is engineered for powerful air circulation in demanding environments such as workshops, garages, and residential spaces. Featuring a durable metal construction, it offers robust reliability alongside a three-speed motor for precise airflow control. The adjustable tilt head and sturdy base ensure directed cooling and stability wherever it is placed.
