Product Overview

High-Velocity Industrial Ventilation

This high-velocity industrial fan is engineered for robust performance in demanding environments such as factories, warehouses, and workshops. Featuring a durable metal frame and precision-balanced blades, it delivers powerful airflow for effective cooling and ventilation. The design prioritizes longevity and safety, incorporating a high-quality motor with solid lubricants and a reinforced safety grill for secure operation.

Construction & Design

Material Composition

- Metal frame
- PP or ABS plastic panel

Mounting Type

Wall-mounted

Technical Specifications

Motor Features

High-quality motor with solid lubricants for extended service life

Voltage Options

Double voltage option available

Control Type

Switch control (Auto type)

Certifications & Compliance

Safety Certifications

GS • CB • UL • CE • CCC • geprüfte Sicherheit
