

High-Visibility Warning Triangle

High-visibility warning triangle reflectors enhance road safety during breakdowns or emergencies. Crafted from durable materials, they withstand various weather conditions and provide optimal visibility for approaching vehicles.

Product Overview

High-Visibility Warning Triangle

This high-visibility warning triangle is an essential safety tool designed to enhance road safety during vehicle breakdowns or emergencies. Crafted from durable materials, the reflector is built to withstand various weather conditions while providing optimal visibility for approaching traffic. Its bright, reflective surface ensures maximum conspicuity, making it an ideal choice for use on roadways, highways, and parking lots to signal caution and prevent accidents.

Technical Dimensions

Length	158 mm
Width	40 mm

Usage Information

Suitable Environments	Roadways, Highways, Parking Lots, Emergency Situations
