

High-Voltage Mosquito Killer Module

High-voltage discharge mosquito killer modules are designed for effective insect extermination. These modules feature compact rectangular epoxy encapsulation, ensuring durability and electrical insulation.

Product Overview

High-Voltage Mosquito Killer Module

This high-voltage discharge module is specifically engineered for effective insect extermination in pest control devices. Featuring a robust, compact rectangular epoxy encapsulation, it provides superior durability and electrical insulation for reliable performance. The unit comes equipped with integrated wire leads, facilitating seamless installation into various mosquito zapper designs.

Technical Specifications

Encapsulation	Epoxy
Shape	Rectangular
Connectivity	Wire leads

Applications

Primary Application

Pest Control • Insect Extermination

Compatible Devices

- Mosquito Zappers
- Insect Traps
