

Hook Type Electric Chain Hoist

This electric chain hoist is designed with a unique structure to minimize the distance between the machine and beam, making it suitable for low buildings or sites requiring expanded hoisting spaces. The chain and brake system are critical components of this machine.

Overview

High-Efficiency Lifting Solution

The HHBB Electric Chain Hoist is engineered for optimal performance in space-constrained environments, such as side-low buildings or temporary construction sites. Featuring a robust electric motor and high-strength G80 chain, this hoist provides reliable lifting power with a focus on operator safety. Its versatile design supports both hook and trolley configurations, making it an ideal choice for diverse industrial and construction applications.

Technical Specifications

Speed Configuration

- Single Speed
- Dual Speed

Mounting Types

- Fixed Hook Type
- Manual Trolley
- Electric Trolley

Safety Equipment

- Rain Cover
- Travel Limiter
- Overload Limiter

Customization

- Custom Color Options (Blue, Yellow, Orange, Red)
- OEM Available

Power Supply

3-Phase 220V-690V, 50/60Hz (Single phase options available)

Insulation Grade

F
