

Horizontal Feed Mixing Wagon

This horizontal mixing wagon is designed for efficient feed preparation in agricultural settings. It features a robust chassis, heavy-duty mixing auger, and a large-capacity trough for handling substantial volumes of feed.

Product Overview

Efficient Feed Preparation Solution

This horizontal feed mixing wagon is engineered for high-performance agricultural feed preparation. Featuring a robust chassis and a heavy-duty mixing auger, it is designed to handle substantial volumes of feed with consistent reliability. The integrated geared motor drive system ensures thorough mixing and even distribution, helping to optimize nutritional consistency for livestock operations.

Technical Specifications

Mixing Mechanism	Horizontal heavy-duty auger
Drive System	Geared motor drive
Chassis Build	Robust heavy-duty frame

Key Features

Performance Highlights

1 Horizontal

Mixing Type

1 Geared

Drive Type

Primary Application

Agricultural, Livestock Feeding, Feed Preparation
