

Horizontal Metal Cutting Band Saw

Horizontal metal cutting band saw machines are designed for cutting various metal materials including steel, aluminum, and other alloys. These machines feature adjustable cutting angles, coolant systems, and automatic shut-off mechanisms for efficient and safe operation.

Overview

Industrial Horizontal Band Saw

This horizontal metal cutting band saw is engineered for precision and efficiency in industrial and workshop environments. Designed to handle a variety of materials including steel, aluminum, and diverse alloys, it features robust construction for maximum stability. The machine integrates advanced safety and operational features, such as adjustable cutting angles, coolant systems, and automatic shut-off mechanisms to ensure reliable performance.

Technical Capabilities

Key Features

- Adjustable cutting angles
- Integrated coolant system
- Automatic shut-off mechanism
- Robust industrial construction

Compatible Materials

Steel, Aluminum, Metal Alloys

Model Comparison

Available Model Variants

Model ID	Automation Level
RMS45B	Standard
RMS7A	Standard
RMS10A	Full Automatic
