

Horizontal Metal Cutting Bandsaw

This horizontal bandsaw is designed for cutting metal with precision. It features adjustable settings and a robust construction suitable for various metal cutting applications.

Overview

Professional Metal Cutting Solution

The BS-1018R is a robust horizontal bandsaw specifically engineered for precise metal cutting in industrial and workshop environments. Featuring a heavy-duty construction with a stable base and adjustable cutting mechanisms, it provides the reliability needed for high-volume tasks. This machine offers versatile control settings to ensure accurate results across various metal types and shapes.

Key Features

Primary Capabilities

Horizontal Cutting, Adjustable Settings, Industrial Grade, Precise Control

Design & Construction

Build Quality

- Robust blue-finished base for vibration damping
- Integrated white/gray cutting assembly
- Easily accessible control panel
- Visible high-tension saw blade

Operation

Application Suitability

Metal Fabrication • Industrial Workshops • Precision Cutting
