

Horizontal Plastic Injection Molding Machine

Horizontal injection molding machines are used for manufacturing plastic parts. The machine has a material hopper, injection unit, clamping unit, and control panel.

Overview

High-Efficiency Injection Molding

This horizontal plastic injection molding machine is engineered for precision manufacturing of diverse plastic components. It integrates a robust clamping unit, a high-performance injection assembly, and a user-friendly control panel to ensure consistent production quality. Designed for reliability, it is an ideal solution for industrial-scale plastic part fabrication.

Technical Specifications

Machine Configuration

Horizontal • Injection Molding

Model Identifier

FV 160

Key Components

Included Assemblies

- Material Hopper
- Injection Unit
- Clamping Unit
- Control Panel
