

Hose Flashback Arrestor Set for Welding and Cutting

Flashback arrestors are designed for use with oxygen and acetylene hoses. These safety devices prevent reverse gas flow and flashback in welding and cutting applications.

Product Overview

Industrial Safety Solution

This Hose Flashback Arrestor Set is an essential safety component for welding and cutting operations. Designed to prevent reverse gas flow and flashback, these devices ensure operator safety and equipment protection. The set includes color-coded units for easy identification and safe installation in industrial environments.

Technical Specifications

Compatible Gases

- Oxygen
- Acetylene

Key Safety Features

Reverse Flow Prevention • Flashback Arresting

Application

Welding, Cutting

Design & Construction

Color Coding

Gas Type	Color
Oxygen	Blue
Acetylene	Red

Installation Indicators

Yes
