

Hot Air Fryer

This hot air fryer cooks food using hot air circulation technology, requiring little to no oil. It has adjustable temperature and timer settings for precise cooking.

Product Overview

Healthier Cooking with Air Circulation

This oil-free fryer utilizes advanced hot air circulation technology to cook food with little to no oil, offering a significantly healthier alternative to traditional deep frying. Designed for versatility, it is ideal for frying, grilling, roasting, and baking a wide variety of foods. The compact design includes a removable basket for easy cleaning and convenient storage, making it a practical addition to any kitchen.

Technical Specifications

Power Output	1500 W
Voltage Compatibility	100-127V~, 220-240V~
Capacity	2 L
Cord Length	1.2 M
Appliance Net Weight	5.6 KGS
