Product Overview

Professional Hot Water Circulation Pump

This high-performance hot water circulator pump is engineered for residential and light commercial heating systems. Designed for reliability, it features a robust construction with an IP44 protection rating and thermal class TF110, ensuring durability in demanding environments. The unit offers three-speed settings to optimize flow and power consumption based on specific system requirements.

Performance Metrics

Key Performance Metrics

65 l/min

Max Flow Rate

6 m

Max Head

45 dB(A)

Noise Level

Performance by Speed

Speed Setting	Max Head (m)	Max Power (W)
Speed 1	3	46
Speed 2	5	67
Speed 3	6	100

Technical Specifications

Electrical Data

- Voltage: 220V
- Frequency: 50Hz
- Input Current: 0.4A
- Capacitance: 3 μ F

Mechanical Ratings

- Protection Class: IP44
- Thermal Class: TF110
- Motor Class: Class F
- Pressure Standard: PN10

Compliance & Safety

Certifications

CE, ISO 9001, RoHS

Safety Note

Never run the pump dry as this may cause damage to the unit.
