

Household Ventilation Exhaust Fan

This is an electrical fan designed for ventilation and air extraction. It features a hinged cover for easy maintenance.

Overview

Efficient Household Ventilation

This household ventilation exhaust fan is engineered to provide reliable air extraction for residential environments. Featuring a durable gray metal construction, the unit is designed with a square frame and a circular fan housing for optimal airflow performance. The inclusion of a hinged cover simplifies routine maintenance and cleaning, ensuring long-term operational efficiency.

Physical Characteristics

Color/Finish	Gray (Metal)
Design Features	Square Frame, Circular Housing, Hinged Cover

Application

Intended Use	Household ventilation and air extraction
