

Household Water Purification Machine

This water purification machine is designed for household use. It features a multi-stage filtration system with three visible filter cartridges.

Product Overview

Advanced Household Water Purification

This household water purification machine is engineered to provide high-quality, clean water on demand through a comprehensive multi-stage filtration process. Featuring a compact under-sink design, it effectively removes sediments and impurities to ensure safe and great-tasting water for your household needs. The system integrates pre-filtration, sediment removal, and activated carbon stages to maintain optimal water clarity and quality.

Technical Specifications

Filtration Stages	3
Installation Method	Under-sink
Filtration Technologies	Pre-filtration, Sediment Removal, Activated Carbon
