

Household Water Purification Machine

This water purification machine utilizes advanced filtration technologies to provide clean and safe drinking water. It features a multi-stage filtration system that removes sediment, chlorine, heavy metals, and other contaminants.

Overview

Advanced Household Purification

This water purification machine provides a high-performance solution for residential water safety. Utilizing a multi-stage filtration system, it effectively targets and removes sediment, chlorine, and heavy metals from the water supply. The unit is engineered for reliable, daily operation to ensure clean drinking water for your home.

Product Details

Model Number	QR-RU-05A
Usage Environment	Household

Technical Specifications

Contaminant Removal	Sediment, Chlorine, Heavy Metals
Filtration System	Multi-stage filtration
