

HSS Countersink Bit Set

This high-speed steel countersink bit set is designed for creating clean, accurate countersunk holes for screws and fasteners. The set complies with DIN335C standards, ensuring consistent quality and performance across various screw sizes and material thicknesses.

HSS

Product Overview

Professional HSS Countersink Set

This HSS Countersink Bit Set is engineered for creating clean, accurate countersunk holes for screws and fasteners. Manufactured in compliance with DIN335C standards, this set ensures consistent quality and reliable performance across various professional applications. The collection includes multiple bit sizes, making it a versatile solution for woodworking, metalworking, and precise assembly tasks.

Technical Specifications

Standard Compliance

DIN335C

Material

High-Speed Steel (HSS)

Suitable Applications

Woodworking, Metalworking, Fastener Installation
