

HSS Multi-Diameter Step Drill Bit

High-speed steel (HSS) multi-diameter step drill bits are designed for drilling multiple hole sizes in thin materials. Each bit features a stepped design, with each step corresponding to a different hole diameter.

Product Overview

High-Speed Steel Step Drill Bit

This multi-diameter step drill bit is engineered for versatility and efficiency in drilling operations. Featuring a stepped design, it allows for multiple hole diameters to be created using a single tool, eliminating the need for frequent bit changes. Constructed from durable high-speed steel, it is ideal for thin materials including sheet metal, plastics, and wood, while simultaneously deburring edges for a clean finish.

Technical Specifications

Key Features

- Multi-diameter stepped design
- Integrated deburring capability
- Wear-resistant construction

Material	High-Speed Steel (HSS)
Compatible Materials	Sheet Metal, Plastics, Wood
