

HVAC Brass Valve Core

Brass valve core used in HVAC&R systems for controlling fluid flow. It features durable brass construction, ceramic disc, and rubber seals for reliable performance and leak prevention.

Product Overview

HVAC Brass Valve Core

This brass valve core is engineered specifically for HVAC&R systems, providing precise control over fluid flow. Constructed with durable brass, it features a ceramic disc mechanism and high-quality rubber seals to ensure reliable performance and prevent leaks. Designed for ease of installation, this component offers long-lasting operation in a wide variety of valve applications.

Technical Specifications

Key Performance Features

- Fluid flow control
- Leak prevention
- Easy installation
- Durable construction

Material Construction	Brass, Ceramic Disc, Rubber Seals
Application Area	HVAC&R Systems
