

HVAC Pressure Reducing Valve with Gauge

This pressure reducing valve is designed for HVAC&R systems. It allows for precise pressure regulation and features threaded connections for easy installation, along with a pressure gauge to monitor downstream pressure.

Overview

Professional HVAC Pressure Regulation

This pressure reducing valve is specifically engineered for HVAC and refrigeration systems to ensure consistent and stable downstream pressure. It features a robust, durable construction designed for long-term reliability in demanding industrial environments. The integrated high-precision pressure gauge allows operators to monitor and adjust system pressure with ease, ensuring optimal performance and safety across all applications.

Technical Specifications

Pressure Range

200 P.S.I.

Max Pressure

Connection Size

1/2 inch

Rated Pressure Rating

16 bar

Features

Product Features

- Integrated precision pressure gauge
- Robust construction for HVAC&R systems
- Threaded connection type for easy installation
- Stable and adjustable pressure regulation

Suitable Applications

HVAC Systems, Refrigeration, Industrial Fluid Control
