Product Overview

Professional HVAC Diagnostic Solution

This aluminum manifold gauge set is a comprehensive tool engineered for precise HVAC and refrigeration system diagnostics. Featuring a durable aluminum body and high-accuracy gauges, it provides reliable pressure readings for both high and low-side systems. The set is fully equipped for critical maintenance tasks, including evacuation, system charging, and performance analysis, making it an essential kit for professional technicians.

Technical Specifications

Compatible Systems

- Air Conditioning
- Refrigeration

Material	Durable Aluminum
Pressure Units	PSI, BAR

Key Features

Included Components

- Aluminum manifold body
- Dual pressure gauges
- Color-coded hoses
- Adapters
- Rugged carrying case

Primary Applications

Diagnostics • Leak Detection • System Evacuation • Refrigerant Charging
