

HVAC Valve Tail Piece Set

This tail piece set is designed for use in HVAC&R valve systems. It facilitates connections and adjustments within plumbing and refrigeration setups.

Product Overview

HVAC Valve Tail Piece Set

This tail piece set is specifically engineered for HVAC&R applications, providing reliable flow control and system adjustments. Featuring a robust valve design with an ergonomic black handle, it is constructed from high-quality, corrosion-resistant materials. Designed for both industrial and residential environments, this set ensures longevity, efficiency, and seamless integration within complex plumbing and refrigeration setups.
