Product Overview

HVAC&R Safety Valve

This high-performance safety valve is engineered for pressure relief and temperature regulation within HVAC&R systems. Constructed with a robust brass body, it provides reliable overpressure protection to ensure system integrity and longevity. Designed for professional heating and plumbing applications, this component serves as a critical safety mechanism for demanding industrial and commercial environments.

Technical Specifications

Model Code	Y00587
Specification	1/2 inch
Material	Brass

Key Features

Attributes	Pressure Relief, Temperature Regulation, Overpressure Protection, HVAC&R Compatible
------------	---

Manufacturing Standards

Quality Commitment

- 20 years of manufacturing expertise
- Cost-efficient engineering
- Green manufacturing processes
- Professional technical support
