Product Overview

HVAC&R System Safety Valve

This professional-grade safety valve is engineered for reliable overpressure protection in heating, ventilation, air conditioning, and refrigeration systems. It plays a critical role in preventing equipment damage and ensuring operational safety by automatically releasing excess pressure. The valve features a durable brass body construction designed for long-term performance in demanding industrial and commercial environments.

Technical Specifications

Model Configurations

Product Code	Connection Size
Y00495	1/2"
Y00496	3/4"

Compatible Systems

- Heating Systems
- Ventilation Systems
- Air Conditioning
- Refrigeration

Material

Brass Body
