

HVLP Automotive Refinishing Spray Gun

This HVLP spray gun is designed for automotive refinishing. It features adjustable fluid and air controls and a gravity feed cup.

Overview

Professional Automotive Refinishing Solution

This High Volume Low Pressure (HVLP) spray gun is engineered specifically for high-quality automotive refinishing applications. It features a durable, chrome-plated body designed for longevity and ease of maintenance, ensuring consistent performance in demanding workshop environments. With precision-adjustable fluid and air controls, this tool provides the control necessary for applying base coats, clear coats, and various automotive paints with high material transfer efficiency.

Technical Specifications

Spray Technology

HVLP • High Volume Low Pressure

Feed System	Gravity Feed
Body Material	Chrome-plated

Features

Adjustable Controls

- Fluid control
- Air control

Applications

Suitable Applications	Base coats, Clear coats, Automotive paints
