Product Overview

High-Efficiency HVLP Spraying System

This 600W high-atomization electric spray gun is designed for professional-grade finishes with maximum efficiency. Utilizing HVLP (High-Volume, Low-Pressure) technology, it ensures consistent material transfer while minimizing paint waste and overspray. The split-design architecture, featuring a 2-meter flexible hose, offers superior maneuverability and ease of use for various painting and coating applications.

Technical Specifications

Motor Power

600 W

Power Consumption

Hose Length

2 m

Features

Key Features

- Plug-and-play operation for immediate use
- High-atomization technology for uniform finish
- Detachable and washable components
- Anti-corrosion construction
- Split design for improved portability

Suitability

Professional Use, DIY Projects, Painting, Coating
