

Hydraulic Bottle Jack for Automotive and Industrial Use

These heavy-duty hydraulic bottle jacks are designed for various lifting applications. They are available in 4-ton and 6-ton capacities, ideal for vehicles, machinery, and other heavy objects.

Product Overview

Heavy-Duty Hydraulic Lifting

This vertical hydraulic bottle jack is engineered for demanding automotive and industrial lifting applications. Built with robust construction, it provides reliable performance for lifting vehicles, machinery, and other heavy loads. Available in versatile capacity options, it serves as an essential tool for professional workshops and industrial maintenance environments.

Technical Specifications

Available Capacities

- 4-ton
- 6-ton

Model Number	T20202
Design Type	Vertical Hydraulic Bottle Jack
Manufacturing Origin	Hangzhou, China

Application

Primary Applications	Automotive Repair, Industrial Maintenance, Heavy Machinery Lifting
