

Hydraulic Crimping Tool Set

This professional crimping tool set utilizes a lever transfer torque design, offering significant energy savings. The tool ensures high crimping quality through precise crimping modules and a reliable locking mechanism.

Product Overview

Professional Hydraulic Crimping Solution

This professional-grade crimping tool set is engineered for high-performance cable termination. Featuring an advanced lever transfer torque design, it reduces operator effort by up to 30% compared to standard tools. The unit is constructed from high-durability special steel, subjected to rigorous quenching and annealing processes to ensure long-term reliability and consistent crimping quality.

Performance & Design

Energy Saving

30 %

Energy Reduction

Key Design Features

Ergonomic handle, Lever transfer torque, Self-locking mechanism, Angled press top, Barycenter balance

Technical Specifications

Compatible Crimping Dies

- AP-30J
- AP-03D
- AP-03B
- AP-06WF2C
- AP-04WFL
- AP-103
- AP-10WF
- AP-16WF
- AP-06WF
- AP-04WF
- AP-35WF
- AP-10

Quality Assurance

Factory calibrated • Repeated crimping precision

Material & Treatment

Special tool steel with quenching and annealing treatment
