

Hydraulic Cutter and Tongs Attachment

This heavy-duty cutter and tongs attachment is designed for industrial machinery. It features a robust hydraulic system for powerful cutting action and a secure grip.

Product Overview

Heavy-Duty Hydraulic Attachment

This hydraulic cutter and tongs attachment is engineered for demanding industrial environments, offering a dual-function design for both precise cutting and secure material handling. Built with high-strength steel, it ensures exceptional durability and longevity under heavy workloads. Its versatile compatibility makes it an ideal solution for construction, demolition, and material processing operations.

Technical Specifications

Construction Material	High-strength steel
Application Areas	Construction, Demolition, Material Processing

Key Features

Hydraulic System

Heavy-duty • Powerful cutting action • Secure grip
