

Hydraulic Cylinder for Lifting

This hydraulic cylinder is designed for lifting and pushing applications. Its robust construction provides durability and reliability in demanding environments.

Overview

Industrial Hydraulic Lifting Solutions

This heavy-duty hydraulic cylinder is engineered for demanding lifting and pushing applications in industrial and construction environments. It features a robust construction designed for durability, reliability, and precise control under high-force conditions. The unit is compatible with a wide range of pneumatic, manual, and electric hydraulic pumps, ensuring versatile integration into existing systems.

Compatibility

Compatible Pneumatic Pumps

- HPV1500
- HPV2250
- HPV-250
- HPV-800

Compatible Manual Pumps

- HPM-700A/B/C/D
- HPM-1000
- HPM-1500
- HPM-2000
- HPM-2800

Compatible Electric Pumps

- HPD-700
- HPD-700B
- HPD-2000
- HPD-3000
- HPD-5000

Compatible Fuel Valve Test Rigs

HOP1100, HOP1100D, HOP600, HOP600B, HOP720, 403ZJ

System Components

Associated System Components

Tensioning Jack • Hydraulic Hose • Quick Coupling
