

Hydraulic Excavator

This hydraulic excavator is designed for demanding construction and excavation tasks. It features a powerful engine, providing ample digging force and efficient operation.

Overview

Professional Hydraulic Excavator

This robust hydraulic excavator is engineered for demanding construction and excavation tasks, featuring a powerful engine for stable and reliable performance. It incorporates an imported hydraulic system that delivers exceptional digging force and precise control. Designed with operator productivity in mind, the machine includes an ergonomic cab, adjustable suspension seating, and comprehensive real-time monitoring via a color LCD display.

Performance & Hydraulics

Key Operational Features

- Powerful engine for stable operation
- High-reliability hydraulic system
- Automatic oil-filling pump

Hydraulic System Origin	Imported world-brand
-------------------------	----------------------

Operator Environment

Cab Comfort & Ergonomics	Ergonomic Design, Wide Visibility, Adjustable Suspension Seat
--------------------------	---

Maintenance & Monitoring

Maintenance & Monitoring

- Fully open engine hood for easy access
- Color LCD monitor for real-time data
- Integrated machine testing and monitoring
