

Hydraulic Hand Pump for Single-Acting Cylinders

Hydraulic hand pump designed for use with single-acting cylinders. Features a two-speed operation for rapid cylinder advance and controlled retraction.

Product Overview

Professional Hydraulic Power

This hydraulic hand pump is engineered specifically for single-acting cylinders, providing reliable and portable hydraulic power for various industrial and automotive tasks. It features a robust two-speed operation system that allows for rapid cylinder advancement and precise, controlled retraction. Built with durable steel, this tool includes an integrated pressure relief valve to ensure safety and overload protection during demanding operations.

Technical Specifications

Operation Type

Two-Speed

Model Number

CP-180B

Compatible Cylinders

Single-Acting

Safety Features

Internal Pressure Relief Valve, Overload Protection

Construction

Durable Steel

Applications

Primary Applications

- Industrial Maintenance
- Automotive Repair
- Portable Hydraulic Power Tasks
