

Hydraulic Hose Crimping Machine

This hydraulic hose crimping machine is designed for assembling hydraulic hoses with precision and efficiency. It features a robust construction for durability and reliability in demanding industrial environments.

Overview

Industrial Hydraulic Hose Crimping Machine

This hydraulic hose crimping machine is engineered for high-precision assembly of hydraulic hoses in demanding industrial environments. With a powerful crimping force of 1370KN and a production capability of up to 850 pieces per hour, it offers both reliability and high throughput for manufacturing and repair operations. The unit features a user-friendly control system and includes a versatile set of 9 dies to accommodate a wide range of hose sizes.

Performance

Crimping Force

1370 KN

Crimping Force

Production Capability

600-850 PCS/HOUR

Technical Specifications

Crimping Range	10-61 mm
Supported Hose Sizes	1/4" - 1 1/2"
Number of Die Sets	9
Maximum Opening	25 mm
Control Type	MS/UC

Physical Attributes

Motor Power	3KW / 4KW
Machine Dimensions	760 x 560 x 800 mm
Machine Weight	182 kg
