

Hydraulic Jack for Heavy Lifting

This 4-ton hydraulic jack is designed for lifting heavy loads. Its compact design ensures convenient storage and portability.

Product Overview

Heavy-Duty Hydraulic Lifting Solution

This 4-ton hydraulic jack is engineered for reliable, heavy-duty lifting in professional environments. Featuring a robust construction and a smooth, controlled hydraulic system, it ensures precise operation for various mechanical tasks. Its compact design prioritizes both portability and ease of storage, making it an essential tool for workshop and maintenance applications.

Technical Specifications

Lifting Capacity	4 ton
Gross Weight	4.3 kg
Model Number	HY4-00-4000H

Safety and Usage

Operating Instructions

- Turn release valve clockwise firmly to close
- Insert handle into socket
- Pump handle until saddle reaches desired height
- Always center load on saddle
- To lower, turn release valve slowly counterclockwise
- Keep saddle fully retracted when not in use

Safety Warnings

Use on hard level surface, Do not use to support raised vehicle, Use jack stands, Avoid overloading, Use only hydraulic jack oil
