

Hydraulic Metal Coil Decoiler Uncoiler

This hydraulic decoiler uncoiler machine efficiently unwinds and recoils metal coils. It features a robust hydraulic system for smooth, controlled operation and consistent material feeding.

ADDITIONAL IMAGES

Product Overview

Heavy-duty hydraulic decoiler designed for efficient and precise metal coil handling in industrial environments.

Hydraulic Metal Coil Decoiler

This hydraulic decoiler uncoiler machine is designed for efficient and precise material handling in metal forming processes. Featuring a robust steel frame and an advanced hydraulic system, it ensures smooth and controlled unwinding of metal coils. The machine is highly versatile, accommodating various coil widths and diameters, making it an essential component for rolling mills and metal processing lines.

Suitable Applications

Rolling Mills, Metal Forming, Roofing Tile Production, Wall Sheet Lines, C/Z Purlin Lines, Slitting Lines

Technical Features

Detailed view of the hydraulic decoiler showing the control panel and robust frame construction.

The hydraulic decoiler features a robust steel frame and electrical control panel for precise material feeding.

Operation Type	Hydraulic system for controlled decoiling
Frame Construction	Robust steel frame
Control System	Electrical control panel for speed and tension adjustment
Safety Features	Emergency stop buttons, Protective covers

Service & Support

Support Channels

- 24-hour phone support
- Email
- Skype
- WhatsApp
- WeChat

Installation & Training

- Factory visit training
- Instruction manuals and video guides
- On-site technician assistance available

Warranty	1 Year
