Overview

Reliable Hydraulic Material Handling

This heavy-duty hydraulic pallet truck is designed for efficient, long-term use in demanding warehouse and industrial environments. Featuring a robust full hydraulic system, it offers a 210-degree turning radius for superior maneuverability in tight spaces. The unit is engineered for durability with grease fittings at all pivotal points and an overload by-pass valve to ensure safe and reliable operation.

Performance Metrics

Load Capacity

2500 kg
Max Capacity

Lift Performance

- Number of pump strokes: 10
- Lift height per stroke: 12mm

Technical Dimensions

Standard Specifications

Specification	Available Options
Total lift height (mm)	200 / 190 / 150 / 142
Lowered fork height (mm)	85 / 75 / 60 / 52
Fork length (mm)	900 / 980 / 1000 / 1100 / 1150 / 1220
Width over forks (mm)	520 / 550 / 650 / 680 / 685

Construction & Features

Certifications

CE • TÜV

Key Features

- Full hydraulic system
- Leak-proof hydraulic design
- Overload by-pass valve
- Grease fittings at pivotal points
- 210-degree turning radius

Wheel Options

Nylon, Polyurethane, Rubber
