

Hydraulic Pipe Roll Groover

This roll groover is designed for creating grooves in pipes. It features a hydraulic feed system that ensures consistent groove depth and a quick setup mechanism for efficient operation.

Overview

Professional Hydraulic Pipe Roll Groover

This hydraulic pipe roll groover is a precision-engineered tool designed to handle both schedule 10 and schedule 40 pipes efficiently. Powered by a robust 750W induction motor, it ensures steady, quiet, and reliable operation for industrial and construction environments. With a quick setup mechanism and hydraulic feed, it is the ideal choice for professionals requiring consistent and high-quality pipe grooving.

Technical Specifications

Motor Power	750 W
Operating Speed	24 r/min

Capacity

Grooving Capacity

Schedule	Pipe Range	Materials
Schedule 10	2" - 12"	Steel, Stainless Steel, PVC
Schedule 40	2" - 8"	Steel, Stainless Steel, PVC

Features

Key Features	Hydraulic Feed, Induction Motor, Quiet Operation, Quick Setup
