Product Overview

High-Performance Steering Rack

This hydraulic power steering rack is engineered specifically for VW Polo 1.6L and 2.0L models produced between 2003 and 2007. It serves as a critical component in the steering system, efficiently converting rotational input into precise linear wheel movement. The assembly is built for durability and reliable performance, ensuring a seamless fit and responsive handling for the vehicle.

Technical Specifications

Port Configurations

Connection Type	Specification
Outlet Port	M16*1.5
Inlet Port	M14*1.5
Threaded Ends	M14*1.5

Total Length: 1212 mm

Input Shaft Diameter: 17.4 mm

Spline Count (Z): 22

Compatibility & Features

Sensor Compatibility

Double Sensor

Vehicle Model Years: 2003, 2004, 2005, 2006, 2007

Ordering Information

Order Terms

- Minimum order quantities flexible (scattered orders welcome)
- Immediate delivery available for items in stock
