

Hydraulic Scrap Metal Grapple for Marine Use

This heavy-duty grapple is designed for handling scrap metal and marine parts. It features a multi-jawed hydraulic grab for lifting and moving large volumes of irregular materials.

Product Overview

Industrial Marine Scrap Grapple

This heavy-duty hydraulic grapple is specifically engineered for the rigorous demands of shipbuilding and marine demolition environments. Featuring a multi-jawed hydraulic design, it is optimized for efficiently handling and moving large volumes of irregular scrap metal and bulky marine components. Constructed from high-strength steel, this tool ensures exceptional durability and reliable performance in high-pressure industrial applications.

Technical Specifications

Recommended Use

- Shipbuilding
- Marine demolition
- Scrap metal handling

Material Composition	High-strength steel
Operational Mechanism	Multi-jawed hydraulic grab
