Overview

Our machines feature beautiful appearance, simple operation, reasonable price, good quality and so on.

A robust hydraulic decoiler designed for efficient material feeding in roll forming lines.

High-Efficiency Hydraulic Decoiler

This hydraulic steel coil decoiler is designed to provide reliable support and smooth material feeding for various roll forming machines. Built for industrial durability, it features a robust construction and a hydraulic system that ensures precise, controlled uncoiling of steel, iron, and galvanized coils. It is an essential component for continuous production lines, helping to minimize material waste and improve overall forming efficiency.

Technical Specifications

Hydraulic expansion system provides secure coil clamping and smooth operation.

Maximum Material Width	1250 mm
Machine Weight	2.5 T
Dimensions (L x W x H)	1.7m x 1.7m x 1.5m
Compatible Materials	Color Steel Coil, Steel Coil, Galvanized Coil, Iron Sheet

Service & Terms

Professional packaging ensures safe transport of your equipment.

Payment Terms

- 30% down payment via T/T
- 70% balance via T/T after inspection before delivery

On-Site Installation Support

We offer technician deployment to your country for machine installation and setup. The buyer is responsible for all associated costs, including visas, round-trip tickets, suitable accommodation, and a daily service fee of 80 USD.

Warranty	12 months limited warranty
Delivery Lead Time	30 days after receipt of advance payment
